Just as when you shift gears on your car you must first disengage from one gear before re-engaging in a new gear, you must attain a mindset of detachment in order to release connections to physical realities you have felt locked into with your thoughts and feelings. All possibilities are equally real in the multiverse.

When you realize that some information is moving forward in time and some back. It's believed that there are multiple universes where there you exist, but with alternate outcomes. Could the solution to the dilemma of indeterminism be a universe in which all possible outcomes of an experiment actually occur? Archived from the original on 20 May. It shows tiny temperature fluctuations. Nature of Space and Time.
