I hope you will find his insights valuable as an outsider. Yes, we actually split that into two. This document explains about how to use the utility for data load and dimension. But users must still have to figure out the insights on the best possibilities based on the analytics. SQL Server has changed quite a bit since those days, right? You can have a clustered index but you cannot have a primary key in the history table. This has been one of the most actively discussed aspects among current Power BI users. Those that are accustomed to the cards concepts in EPM SaaS Products, this would be not be a surprise but rather on a white background.
