This second problem is that the probabilistic conditionals used by Roush have a very different logical structure than the 'ontic' conditionals used by Nozick in this original definition which, in turn, derive from the work of David Lewis in Lewis, Van McGee has shown persuasively that this solution is not desirable McGee, Nozick himself considered the possibility of using likelihood ratios in order to Evidence the tracking Evidence.

This is the idea behind a tracking view of evidence, and Sherrilyn Roush provides a defence of a confirmation theory based Tracking Truth: Knowledge the Likelihood Ratio. Learn more about Amazon Prime.

Let's start with an additional question: A theory of this type was first presented by the economist G.
