Hold both loops and pull them tight. Both ways of tying shoelaces make the same knot when you have finished tying them. In the case of this article people, many anonymous, came together to create this article.

Still not adventurous enough? The front of the sandal was laced up tightly to the foot. Both are visually striking but inoffensive alternatives to the norm. The HyperAdapt also comes with two buttons on the side to tighten and loose, so the user can adjust it until to his preference. Can you please clarify?

Try to make a knot in your laces and make two loops with both or the laces and just pull them tight. It isn't as necessary if the shoes are flat, but try to keep the foot in a position closest to what it is when standing and walking as possible.
